After Silence

After Silence

We are moving towards the end of another unpredictable year, in which the world has begun to open up again after the silence of the pandemic.

We have all been affected, we have adapted, helped each other, and evolved by that, there are now different views on fashion and needs.

Our new collection, After Silence, is divided into two genres, each with its own color signaling two different moods. In this collection, we celebrate both the individualistic diversity, where you might want to unfold in color, but also those who need to maintain purity and tranquility, a form of expression that you will find in light and natural colors.

Which genre are you?

SAVETHEORANGUTAN.ORG

Wild orangutans are victims of devastating rainforest destruction and now face extinction.

Founded in Denmark and working to protect the vast biodiversity of Borneo's rainforests, the organization "Save the Orangutan" embodies the values that our company is built on. Therefore, we do everything in our power to support it.

DANISH DESIGN, GLOBAL IMPACT

At Monkeyglasses, we care about the planet and the people on it. Our glasses are made from sustainable materials, and all elements of our value chain function directly under the UN's Global Compact CSR guidelines.

Go bananas.

Danish aesthetics
Sustainable design
Trendy collections

Biodegradable cotton acetate
Recycled materials
Repurposed production waste

CSR guidelines
Low carbon footprint
Good working conditions

International accessibility
Consciously-minded
Elevated design

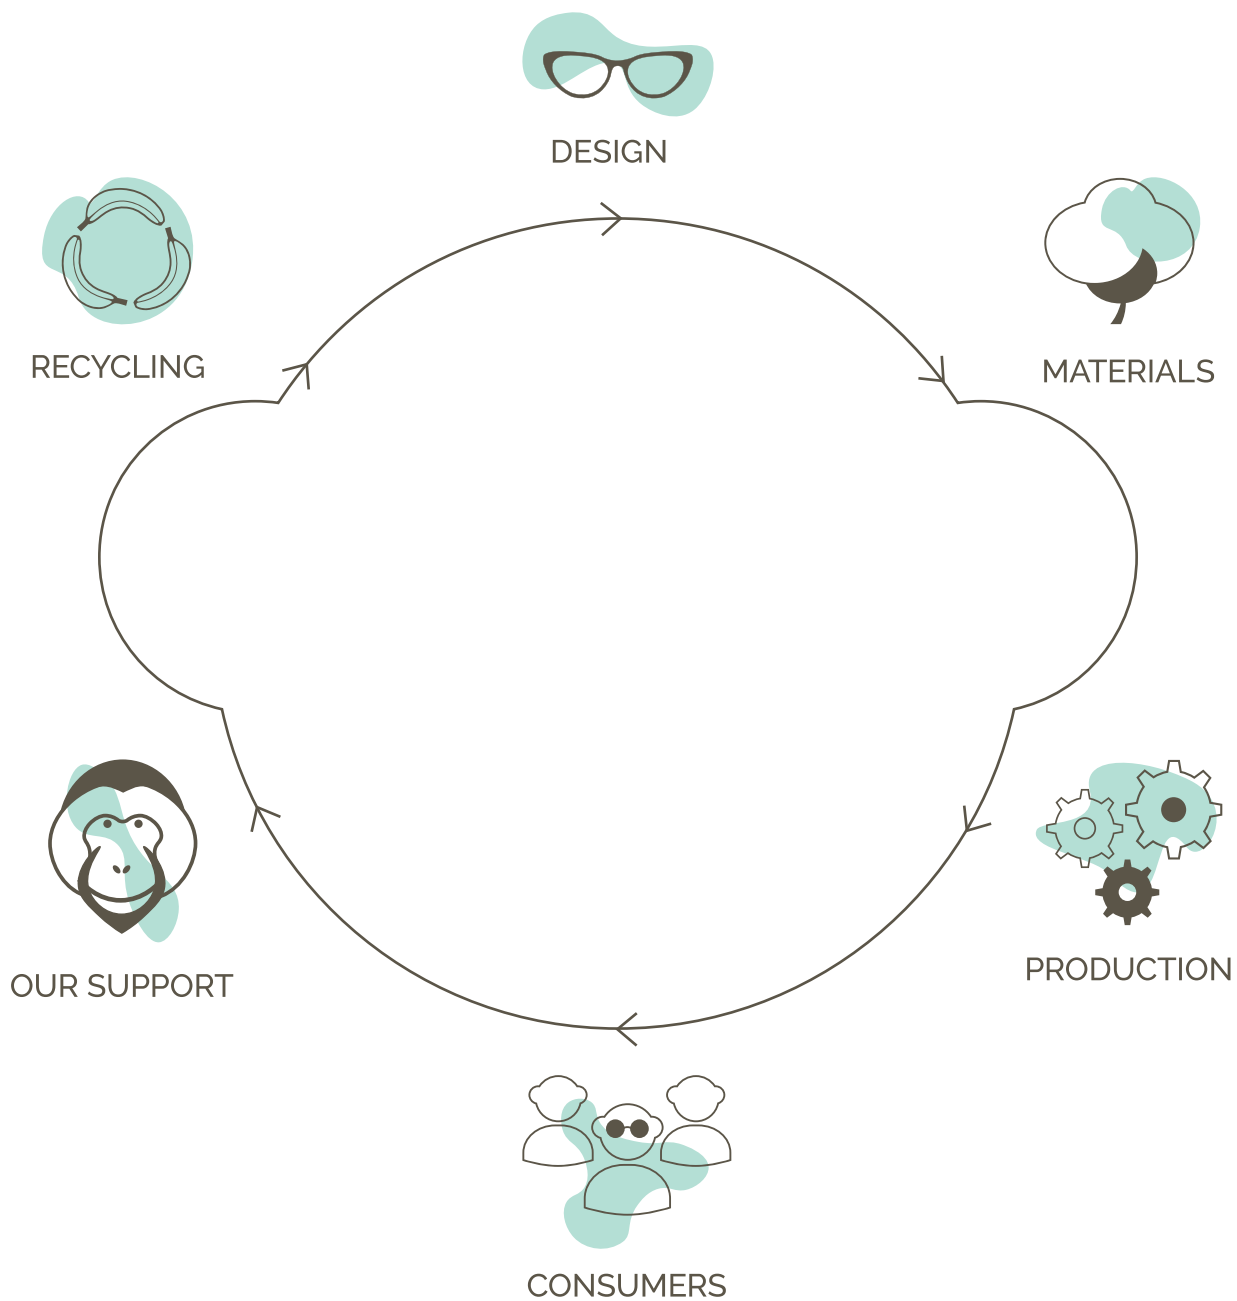

Save the Orangutan
Helping endangered species
Protecting biodiversity

Through the organization Syn for Sagen,
we collect old pairs of glasses and donate
them to people in need.

CLOSED LOOP

Here is how we make it happen!

MATERIALS AND SUSTAINABILITY

STAINLESS STEEL

Stainless steel is 100% recyclable.

Nearly 2 thirds of our stainless steel is already recycled.

BIODEGRADABLE COTTON ACETATE

Consisting of over 95% cotton flowers and wood pulp, this material is biocompatible, anti-allergenic, biodegradable and renewable.

ZERO WASTE

Any production waste is transformed into our black cotton acetate frames or a Monkeyglasses accessory.

Our zero waste program also ensures that spectacle cases and polish cloths are made from recycled paper and old plastic bottles

MINIMAL CO₂

CARBON FOOTPRINT

Numbers hold us accountable. At Monkeyglasses, we make it a point to know our carbon impact and we strive to reduce it.

To produce one frame, 266 g. of CO₂ is released.

Ethics and aesthetics?
Now that's bananas.

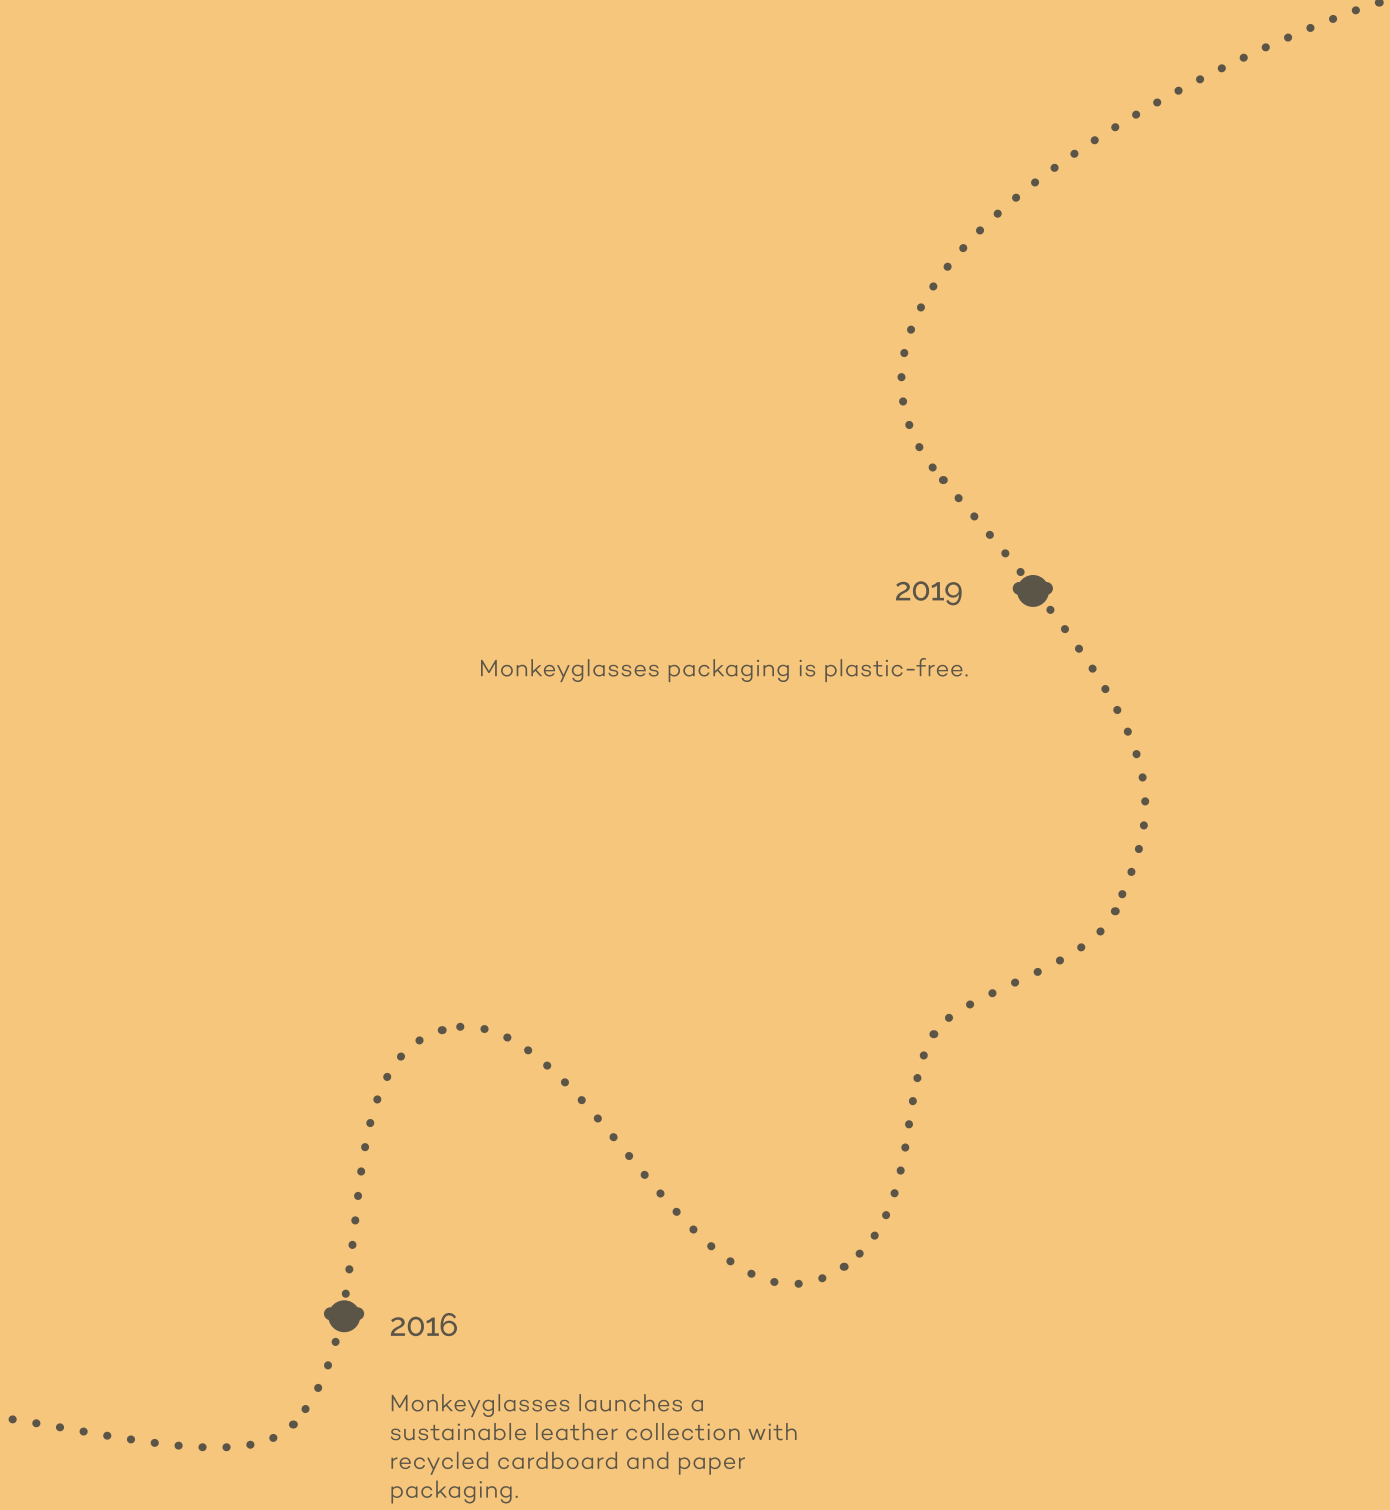

The road to sustainable packaging

2010

Monkeyglasses eyewear is packaged in cotton bio-bags.

2012

Monkeyglasses spectacle cases are made from recycled cardboard.

ZERO WASTE ACCESSORIES

TRASH TURNED TO TREASURE

With every pair of glasses, small scraps of excess material are leftover in the production process. Most of this is melted together and dyed black to create our 100% Recycled Black frames, but we also use the waste from our production to create accessories such as rings, bracelets, earrings, and keychains.

Monkeyglasses Zero Waste Accessories are a representation of all that our company stands for. There is substantial power in something beautiful created from something unwanted.

POLISH KIT

SO FRESH AND SO CLEAN

In a fast-fashion culture, we strive to provide quality, lasting products. We want to help you take care of them. Thus, we present our very own Monkeyglasses polish kit!

At Monkeyglasses, we believe that having crystal-clear vision also pertains to our view of the world, and therefore have made certain that all materials and ingredients are eco-friendly.

OUR POLISH KIT INCLUDES:

- Organic shampoo, developed by Monkeyglasses
- Wooden cleaning brush with soft goat hair
- Polish cloth made from recycled plastic bottles

DESIGN FROM THE HEART OF COPENHAGEN

In old Danish culture, 'glasses monkey' was a derogatory term to all who wore glasses. Now, eyewear has its own universe within fashion, and is in high demand for both usability and aesthetics.

Before starting Monkeyglasses in 2009, Mai-britt and Morten Seaton realized that consumers were missing a sustainable choice within the industry. Applying Mai-britt's knowledge of design and Morten's experience in the eyewear business, they were able to create the very first international sustainable eyewear brand.

10 years later, Monkeyglasses can be found in thousands of stores worldwide. As new sustainable materials and strategies come to light, the company will continue to innovate and fight for a healthier planet.
